

Annemarie Belteu Bio

Dr. Annemarie Belteu has 25 years of progressive experience at Beckman Coulter, Inc. as a scientist, engineer, project manager, and program manager. She has extensive experience with cross-functional teamwork, virtual teams, teaching, IVD reagent and instrument development, reagent and instrument manufacturing processes, Logistics, IT, and bar code labeling. She is currently working on FDA Unique Device Identifier and DoD Item Unique Identification bar code labeling using the HIBCC and GS1 Standards under the Global RA team in the Beckman Coulter headquarters.

Before joining BEC, she synthesized organometallic complexes at Argonne National Laboratory, characterized RNA polymerase/DNA interaction at Colorado State University and investigated calpain/membrane interaction at the University of Minnesota. She has taught Yoshinkan Aikido for more than 20 years, and volunteers for the local PMI chapter as a writer and course instructor.
