

Mr. Olsen,

Thank you for making it possible for me to attend Hood college's MBA program. The Association of Medical Diagnostics Manufacturers Scholarship has undoubtedly allowed me to achieve my career goals. I grew up in Bradford, Pennsylvania and attended the University of Pittsburgh for undergraduate and graduate Bioengineering. During my schooling there I had the opportunity to work on a variety of medical device technologies. My experience helped me to obtain my current position at Fort Detrick as a Biomedical Engineer supporting the Army developing medical device technologies to support our nation's warfighters. My MBA concentration is FDA regulatory compliance which is helping me become more knowledgeable about medical device / drug / biologic research and development policy. Thank you again for the financial support! My degree would not be possible without your donation!

Sincerely,

Greggory Hoader

Dear Mr. Leif Olsen,

Thank you for making it possible for me to attend Hood; the Association of Medical Diagnostics ^{manufacturer's} Scholarship is important to me because I am pursuing a graduate certificate in Regulatory Compliance. My husband and I live in Frederick, and such a program is only available at Hood. Kind regards,
Sanya Whitaker
